

Terms of Service: Typical Fees and Charges

The following table contains typical fees and charges that may be assessed by either the transmission and distribution service provider (TDSP) or us ("Company"). Customers may be obligated to pay nonrecurring fees as required or allowed by Public Utility Commission of Texas (PUCT) rules, including, but not limited to, fees and charges for establishing, switching, disconnecting, reconnecting, or maintaining electric service. Charges for required, nonrecurring fees will be listed as separate line items on the customer's monthly bill.

This list does not represent all TDSP or Company fees and charges. For questions about these or any other fees and charges, please contact a Customer Care Representative at the toll free phone number listed under "Our Contact Information" located in the Terms of Service document.

Fee Name	Fee Description	AEP-Central Amount		AEP-North Amount	
Move-In	Charge assessed to cover both service connection and disconnection during regular TDSP working hours.	Standard Move-In:		Standard Move-In:

Re-Reads	A Special Meter Reading Charge will be charged when a customer requests that a special reading be taken between normal meter reading cycles or that a meter be re-read to verify the accuracy of a routine meter reading. The fee will not be charged if the new reading indicates that the original reading was in error.	\$17		\$17	

Meter Test Charge	A Meter Test Charge will be charged for each meter tested at the customer's request, or by the Company on behalf of the customer, other than those tests conducted under the frequency guidelines specified by the PUCT. If the results of a test reflect meter accuracy outside the tolerance limits specified by the PUCT, the Meter Test Charge will be waived.	Self-Contained Meter	\$111	Self-Contained Meter	\$112
